

OceanSpill AI

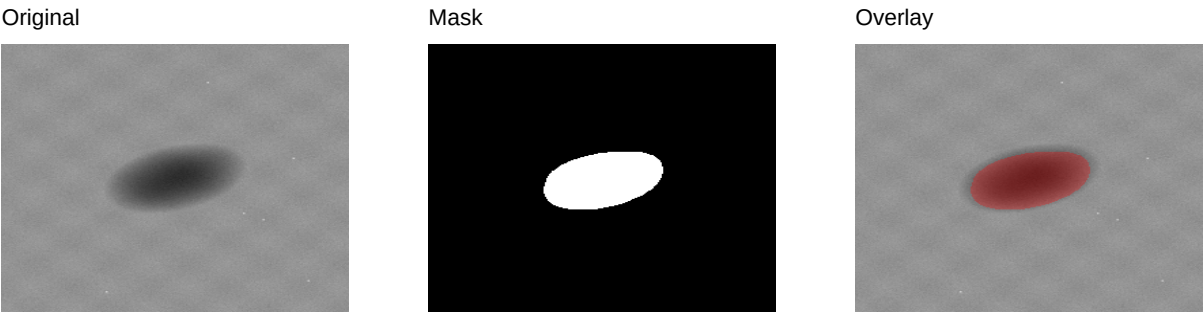

Marine Oil Spill Incident Assessment Report

AI Powered Detection | Satellite Vision | AIS Analysis | Drift Prediction

1. Detection Summary

Parameter	Value
Report ID	OSI-AI-2026-001
Detection Time	2026-08-14T19:13:27.734302
Location	13.08, 80.27
Oil Spill Detected	True
Confidence	97.69%
Estimated Area	4.27 km²
Risk Level	MEDIUM

2. AI Detection Evidence

3. Weather & Spill Drift Prediction

Factor	Value
Wind Speed	14.3 km/h
Wind Direction	175 deg
Current Speed	0.45 m/s
Current Direction	190.0 deg
Drift - Direction	S
Drift - Estimated Drift	24 hourly steps
Drift - Time	24 Hours
12 Hour Forecast	Pending Weather API Integration
24 Hour Forecast	Pending Ocean Current API Integration

4. Environmental & Economic Impact

Impact	Assessment
Nearest Coast	2.43 km
Protected Marine Area	44.11 km
Fishing Zone	10.0 km

Impact	Assessment
Cleanup Cost	\$1921500.0
Economic Loss	\$3483050.45

5. Suspected AIS Vessel & Cleanup Recommendation

AIS Parameter	Value
Ship Name	MT OCEAN PRIDE
MMSI	419001234
Type	80
Distance	0.31 km
Heading	240.0
Speed	1.2 knots
Suspicion Score	105

- Deploy skimmer vessels.
- Protect coastline using floating barriers.

AI Analysis Summary: Satellite segmentation detected possible hydrocarbon contamination. Further confirmation using AIS, weather API and ocean current modelling is recommended.
